OVERVIEW

Nubank is one of the world's largest independent digital banking platforms, originally launching with a no-fee purple credit card controlled entirely via a mobile app.

MISSION & PURPOSE

To fight complexity and empower people to take back control of their financial lives.

NOTABLE IMPACT

"Nubank breaks the oligopoly of Brazil's mega-banks. It revolutionized the notoriously expensive and customer-hostile Latin American banking sector by offering excellent customer service and zero fees."

FOUNDER PROFILE

David Vélez, Cristina Junqueira, and Edward Wible. Vélez, a former VC, experienced a nightmare trying to open a basic bank account in Brazil, which required passing through bulletproof doors and dealing with extreme bureaucracy.
