## OVERVIEW

Paga is a Nigerian mobile payment company that allows users to transfer money electronically and make payments through their mobile devices or through a massive network of physical agents.

## MISSION & PURPOSE

To make it simple for one billion people to access and use money.

## NOTABLE IMPACT

***"Paga's agent network bridges the digital divide in rural Nigeria. They solved the physical cash-in/cash-out problem by building a network of tens of thousands of neighborhood agents (pharmacies, grocers) acting as human ATMs."***

## FOUNDER PROFILE

Tayo Oviosu. A Stanford MBA graduate who returned to Nigeria and founded Paga out of the personal frustration of carrying around wads of cash for simple transactions.
