OVERVIEW

Revolut is a global financial super-app that started by offering multi-currency cards with cheap exchange rates and has expanded into crypto, stock trading, and full banking services.

MISSION & PURPOSE

To unlock the power of a borderless economy for everyone by providing a single app for all things money.

NOTABLE IMPACT

"Revolut hits $33 billion valuation, cementing its status as Europe's most valuable private tech company. They forced legacy UK and European banks to eliminate exorbitant foreign exchange fees."

FOUNDER PROFILE

Nikolay Storonsky and Vlad Yatsenko. Storonsky, a former Credit Suisse trader, was frustrated by the high fees he paid when spending money abroad, leading him to build a borderless card.
